

## PROFESSOR IONEL HAIDUC

This year Professor Ionel Haiduc, President of the Roumanian Academy, celebrates his 75<sup>th</sup> birthday. Born in Cluj on May 9<sup>th</sup>, 1937, Ionel Haiduc graduated from the Faculty of Chemistry of the University of Cluj in 1959 with the best marks to all exams. He distinguished himself as an exceptional personality, dedicated for study, with a remarkable capacity of inter-relating a huge amount of knowledge and an unusual scientific curiosity.

In 1964, he obtained the equivalent of a PhD in chemistry at the M.V. Lomonosov Institute of Fine Chemical Technology in Moscow under the guidance of the Academician K.A. Andrianov.

The scientific life of Acad. Ionel Haiduc was linked to the Faculty of Chemistry, "Babes-Bolyai" University Cluj-Napoca, from 1959 until the present time. Full professor at the age of 36, he completed his formation as a researcher, in U.S.A., between 1966 and 1972, during three post doctoral stages. Between 1990 and 1993 he was the Rector of "Babes-Bolyai" University of Cluj-Napoca and the vice-president of National Conference of Rectors. The passion for science in general and for chemistry in particular, the joy of sharing knowledge was appreciated by generations of students who often would have liked the courses to be never-ending stories. He is an outstanding professor and mentor recognized by the whole academic community.

Scientific interest of Professor Ionel Haiduc covers several areas: Coordination and organometallic chemistry of Main Group elements, Supramolecular organometallic chemistry, Inorganic rings, Biologically active metal compounds (including antitumor activity), Inorganic chemistry nomenclature and systematization. In all these areas Professor Haiduc had a pioneering contribution in Roumania.

A creative mind, born to be a leader, Professor. Ionel Haiduc was always connected to the different aspects of the chemists' community life. As a member of many academic bodies, he was involved in Science policy and management, fighting for quality in all academic activities

The monumental contribution of Acad. Ionel Haiduc to the fields of inorganic and organometallic chemistry can be summarized; his scientific work is covered by 9 books (published in Roumanian, Polish, English and Greek), 25 chapters in collective volumes and more than 400 scientific and review articles (as shown in the list of publications). The chemistry of Inorganic Ring Systems – several books published: the early Roumanian version, "Introducere în chimia ciclurilor anorganice" (1960), followed by the two volumes of "The Chemistry of Inorganic Ring Systems", (Wiley, 1970) and "The Chemistry of Inorganic Homo- and Heterocycles" (Academic Press 1987) – remains one of the favorite area of interest.

"Chimia compușilor metalorganici" (The Chemistry of Metalorganic Compounds) served as an unique source of information for many years for the Roumanian students, and it is the beginning of Organometallic Chemistry in Roumania thought in a systematic way. The extension in English published with J.J. Zuckerman (Basic Organometallic Chemistry) is still a reference book used by many students whole around the world. The applications of organometallic compounds in various domains, including medicine (see the two volumes of Organometallics in Cancer Chemotherapy published with C. Silvestru) was completing the studies on their synthesis and structural characterization.

"Supramolecular Organometallic Chemistry" (co-authored by F. Edelmann), with the Foreword written by Jean-Marie Lehn, Nobel prize winner, describes not only a major field of chemistry, but also a vivid interface between chemistry, biology, physics, and materials science. His brilliant career received a fully deserved recognition. The Roumanian Academy offered him the "Gh. Spacu" prize in 1974 and elected him as corresponding member in 1990 and as titular member in 1991. He was president of the Cluj-branch and vice-president of the Roumanian Academy (1998-2000). Since 2006 he is the President of the Roumanian Academy. Many other national and international awards and prizes mark the exceptional carrier of Ionel Haiduc. To name only a few of them: Humboldt Forschungsaufenthalt (1997), Gauss Professorship, Göttingen Academy (1998-1999), "Pro Colaboratione" Award, Hungarian Academy of Sciences, Debrecen

Branch (1999), Honour Diploma, Presidium of the Moldavian Academy of Sciences (1999), Honorary Member of the Academy of Sciences of Moldova (2002), elected member of Academia Europaea (London) (2002), *Doctor honoris causa*, "Gh. Asachi" Technical University, Iași, Roumania (2002) and Polytechnical University of Timișoara, Roumania (2004), Prize of Roumanian Chemical Society (2004), Nenițescu-Crieger Prize (2005).

He also was awarded by the Presidents of Roumania with "Star of Roumania" ["Steaua României"] (2000) and in 2006 and "Order of Honour", by the President of Republic Moldova.

The exceptional value of Professor Ionel Haiduc was also internationally recognized: elected as member of the editorial scientific board of 9 journals, member of IUPAC, of the International Council of Main Group Chemists and of the Alliance of the Universities for Democracy, he was also invited as visiting professor in USA, Brazil, Spain, Germany and Mexico, Singapore.

With his scientific horizon, his sense of humor and his kindness, he was a perfect ambassador of the Roumanian school of chemistry.

At his 75<sup>th</sup> anniversary, the Editorial Board of *Revue Roumaine de Chimie* along with the whole community of Roumanian chemists present to professor Ionel Haiduc the very best wishes for a long healthy and fruitful life, lot of success in the years to come and express their appreciation for his entire work.
